NEW PUBLISHING SERVICES PARTNERSHIP FROM DUKE UNIVERSITY PRESS, MSP, AND PROJECT EUCLID

Durham, NC— Duke University Press, MSP (Mathematical Sciences Publishers), and Project Euclid announce a new publishing partnership, Alloy: A Publishing Services Alliance.

Alloy was forged with two goals in mind: to offer journals the finest suite of nonprofit publishing services available in the field, and to welcome publishers into a collaboration that treats journals as true partners, not just as clients or profit centers.

MSP founder and president Rob Kirby said, “MSP was conceived as an alternative to the big, profit-driven publishers. We are thrilled to join forces with Duke University Press and Project Euclid in pursuit of our goal to strengthen, defend, and expand independent scientific publishing.”

Each organization will bring its own set of strengths, skills, and experience to the partnership. Alloy features:

- editorial management supported by EditFlow from MSP,
- editing and production from MSP,
- marketing, sales, and customer relations from Duke University Press,
- and online presence from Project Euclid.

Duke University Press Director Steve Cohn said, “We are delighted to bring MSP into the long and very successful collaboration between DUP and Project Euclid. They will bring to this partnership deep knowledge of mathematics and the math community, plus the very best peer-review system in existence for use with math-related subject matter.”

“Providing publishers with the hosting services they need to be competitive and discoverable has always been at the core of Project Euclid’s mission. With MSP and Duke University Press, we have found like-minded partners who can offer publishers truly excellent solutions to the rest of the publication process,” said Leslie Eager, Project Euclid’s Director of Publishing Services.

For more information about collaborating with Alloy, contact Erich Staib at erich.staib@dukeupress.edu.

About Duke University Press

Duke University Press supports scholars in doing what they are passionate about: learning, teaching, and effecting positive change in the world. This bold, progressive spirit drives both what and how DUP publishes. Each year it publishes about 120 new books, more than 50 journals, and multiple digital collections that transform current thinking and move fields forward. Duke University Press thrives as a nonprofit publisher because it adapts, innovates, and forms strong global partnerships in pursuit of its mission. That mission is to find, curate, enrich, and disseminate scholarship that is vital to readers working at the forefront of their fields in the humanities, social sciences, and mathematics. The offices of Duke University Press are in Durham, NC. For additional information, please visit dukeupress.edu.

About MSP

Based in Berkeley, California, MSP develops services and software for publishing (e.g., EditFlow) and produces top-level scientific research publications. It publishes more than 17,000 pages per year and strives to offer the highest quality at the lowest sustainable prices. For additional information, please visit msp.org.

About Project Euclid

A content platform jointly managed by Cornell University Library and Duke University Press, Project Euclid seeks to provide powerful, low-cost online hosting and publishing services for mathematics and statistics scholarship worldwide. As a nonprofit, community-driven, international partnership of academic libraries, independent and society scholarly publishers, and scholars, Project Euclid actively supports broad, sustainable access to this mathematics and statistics literature. For additional information, please visit projecteuclid.org.
